Move Over Einstein!

New theories about the universe!

Promise to prove all others wrong!

The equation of the 21st century:
Universal Infinite Gravity – Universal Infinite Antigravity

$$\infty \cdot G_u = \infty \cdot \bar{G}_u$$

Where,

G_u = Universal Antigravity

\bar{G}_u = Universal Gravity

Survival The Ultimate Mission**

Available in store or on Amazon

SKAF'S JUST BASICS

“SURVIVAL: THE ULTIMATE MISSION”

Books available in store or on Amazon

All current theories about the structure, composition, fabrics, dynamics, and origin of the universes are wrong and flawed. Find the right answers, read “SURVIVAL: THE ULTIMATE MISSION” by Robert Skaf. Compare established theories to the new ones and be the judge.

Example.

Current theory: the universe started by a cosmic explosion. No evidence and no proof, only speculations. New theory: the universe is infinite and was never a singularity. Proof: the greater infinite universe is not made of any particles or sub particles; it is made of dark energy and dark matter. Why? Because an infinite universe cannot have a center of gravity. This is a scientific fact based on the law of physics that no one has observed for thousands of years.

Without a center of gravity, there cannot be any gravity, in the absence of the gravitational force, even the atom is forced to split and disintegrate. This is the proof that the greater universe is infinite. This is why in my opinion the greater universe is made of creative thoughts because a creative thought can morph into anything. This is why the greater infinite universe weighs nothing or zero. Because without a center of gravity, the gravitational force does not exist, and it amounts to nothing. And therefore, one can structure this equation based on the law of physics.

Universal Weight=Universal Mass x Gravity or $UW=UM \cdot 0$ which ends up being $UW=0$

Not convinced? Observe how galaxies do not follow the law of gravity and take the shape of spheres. Answer: in an infinite universe, all celestial bodies are forced to stay on the move. Galaxies in the infinite universe with no center of gravity can be compared to objects that are forever falling into a bottomless pit. As they do, they bump into each other and go flat.

Example.

Current theory: the universe is 14-billion-years-old. No mention of any faraway galaxies that are invisible to conventional instruments. New theory: the universe has been around forever. Not only is the universe infinite, but it is also ageless. It has no beginning and no end. Proof: new evidence shows the existence of dark stars and cosmic bubbles. Bubbles are dark galaxies. This discovery leads me to postulate that other galaxies exist but are beyond the reach of current instruments. We are unable to detect dark galaxies, yet we know they exist. Scientists have detected cosmic ripples. This is proof that the universe is full of dark galaxies that are not coherent. In fact, in an infinite universe, there should be an infinite number of galaxies. In other words, the infinite greater universe has been around forever and will be around forever. Most important of all, it did not start with a big bang.
